Database Application Programming
Project Status and Design Report

Topic:	*This should be the Topic Number and Topic Name.*
Date:	*This should be the date you completed the Report.*
Revision:	*This should be the revision, starting at 1.0, for your Report.*
Team:	*1. This should list the members of your team.*
	2.
	3.
	4.

Team Status:

Task	Team Member	Hours Worked	Hours Remaining

GIT URL:	*The GIT BitBucket URL that I can use to clone your code.*
Hosting URL:	*The Hosting URL that I can use to access your application.*
Peer Review:	*Y/N* We acknowledge that our team has reviewed this Report and we agree to the approach we are all taking.

Supporting Design Documentation

Install Instructions:

Include step-by-step instructions for setting up your database, and configuring and deploying/installing your application. This section should also include detailed instructions for what configuration files are required by your application, what configuration settings need to be adjusted for various runtime (development or production) environments, and where the files need to be deployed to. This section should also contain detailed instructions for how to clone your application source code from Bitbucket and deploy the application to an externally hosted site.

General Technical Approach:

You should, in words, describe your approach and design here. You should also summarize any meeting notes, brain storming sessions, etc. that you want to retain through the design of your project.

Key Technical Design Decisions:

Any final technical design decisions, such as framework decisions and so forth, should be documented here. This should list the technology/framework, its purpose in the design, and why it was chosen.

ER Diagram:

Include an image file of your ER database diagram.

DDL Scripts:

This should contain a link to Bitbucket where the DDL script can be downloaded.

Sitemap Diagram:

Include an image file of your Sitemap diagram.

User Interface Diagrams:

You should insert any wireframe drawings or white board concepts that were developed to support your application. If you have no supporting documentation, please explain the rationale for leaving this section as N/A.

Other Documentation:

You should insert any additional drawings, storyboards, white board pictures, project schedules, tasks lists, etc. that support your approach, design, and project. If you have no supporting documentation, please explain the rationale for leaving this section as N/A.
